5G Smart City

Achieve End Through End Real-Time Visibility With NETSCOUT

NETSCOUT®

Carrier Service Provider
Gain proactive insights with Smart Data, reduce cost, and launch new services faster.

Federal Department of Defense Agencies
Deliver mission critical services with confidence across globally dispersed IT infrastructures.

Education
Gain visibility across campus wide networks to assure end-to-end network performance.

Retail Shops
Assure efficiency in retail operations and services with consistent availability over wired and wireless environments.

Manufacturing
Pave the way to the Edge with scalable monitoring to achieve smooth integration of IoT and IIoT devices.

Insurance
Painlessly integrate 5G/IoT/hybrid cloud technologies, monitor remote operation environments, and protect businesses from cybersecurity attacks.

State, Local Government
Migrate applications and services to the cloud with confidence and drastically reduce CapEx and OpEX without compromising the end-user experience.

Transportation
Proactively manage communication problems to ensure on-time delivery of transportation services with real-time visibility and rapid troubleshooting.

Banking
Secure brand recognition through consistent and reliable delivery of mobile banking applications and services.

Capital Markets
Gain end-through-end visibility to measure latency on applications for SLAs across distributed IT networks.

Healthcare
Ensure Unparalleled performance, uptime, and security 24/7/365 for critical patient care applications and services across networks.

Utilities
Assure high availability of Advance Metering Infrastructure (AMI) and Smart Grids with real-time visibility.

Channel Partners
Achieve customer excellence with NETSCOUT CONNECT 360 and Arbor Advantage Partnership programs.

Pharmaceuticals
Assure reliable business operations and protect R&D and supply chain integrity with real-time monitoring and visibility.
